

# SERVICEMASTER RESTORE CAN GET YOU BACK IN BUSINESS

ServiceMaster Restore can help you give your employees and customers the confidence to return to business as usual. As the country begins to relax stay at home orders and businesses reopen, companies must have plans in place to further reduce the spread and threat of the current virus. At ServiceMaster Restore, we are experts in the disinfection services you need to get your business back up and running.

The COVID-19 pandemic will affect how we think and behave, in the near future and in the long term. Public opinion about business and life in general will be shaped by a much greater awareness of potential infection. Every business, school, church and facility space must now be concerned with preventing infection exposure, not just regular cleaning.

ServiceMaster Restore has the **experience, knowledge, training, and national network** to meet your needs on an ongoing basis. Disinfection goes beyond a standard cleaning service and requires specific protocols.

**“IF YOU WANT TO GET BACK TO PRE-CORONAVIRUS, THAT MIGHT NOT EVER HAPPEN IN THE SENSE THAT THE THREAT IS THERE.”**

**– DR. ANTHONY FAUCI, 4/6/2020**

#### Our disinfection services include:

Wearing appropriate PPE as determined by the most up-to-date CDC guidelines and taking your privacy into consideration when it comes to donning and doffing PPE.

Using EPA registered and approved products from the EPA's List N, which specifically meet the criteria for use against SARS-CoV-2, the virus that causes COVID-19.

Cleaning before disinfecting, a step that is required for true disinfection. We apply specific cleaning techniques to reduce reapplication of soil on surfaces.

Disinfecting after a proper cleaning. We always apply the disinfectant following the product label protocol, including selecting the equipment to apply the product and leaving the surface wet for the required dwell time for the disinfection to be effective as specified by the EPA registered label.

Cleaning up discarded materials and single-use PPE, sealing our soiled materials for proper disposal.

**ServiceMaster Restore follows all regulations, codes, and standards when providing your services, including but not limited to:**

- OSHA: 29 CFR 1910 Subpart I -Personal Protective Equipment, U.S. Occupational Safety and Health Administration
- OSHA: 29 CFR 1910.134 -Respiratory Protection Standard, U.S. Occupational Safety and Health Administration
- OSHA : General Duty Clause, Section S(a){l} of the U.S. Occupational Safety and Health Administration {OSHA)Act of 1970, 29 USC 654(a){ }
- OSHA : 29 CFR 1910.1030 - Bloodborne Pathogens standard

**We pride ourselves on providing service to our customers above and beyond standard disinfection.**

### **Certifications**

ServiceMaster Restore can provide you with a certificate of disinfection with the date and time of your last disinfection. Displaying this can reassure your employees and customers that you are taking ongoing measures to help protect them.

### **Supportive Materials**

We have developed several flyers and videos to arm you with the information you will want to provide your employees and customers. These materials include:

- Detailed hand hygiene instructional flyer
- High Touch Cleaning checklist for your everyday cleaning
- Informational video for employees on everyday tips for their office and common spaces.
- Informational video for employees on everyday tips for cleaning their homes

**THE BEST WAY TO GUARANTEE YOU'RE PREPARED FOR ANOTHER EVENT LIKE THIS IN THE FUTURE IS TO START PLANNING NOW! ASK US ABOUT OUR PRE-LOSS PLANNING AND ENSURE YOUR BUSINESS CAN WEATHER ANY STORM—FROM INFECTIOUS DISEASES AND BIOHAZARD EVENTS TO FIRE, WATER, AND MOLD DAMAGE.**

Please note: Antimicrobial treatment is an excellent interrupter in the process of pathogen transfer but is not a substitute for hygiene. The reintroduction of infected persons into the space requires additional treatment and may result in cross-contamination.
